

**Review of Omega Evolution Extreme X 5/8 inch Paddle
by Jerry Krasnick, member of the Howard County Pickleball Association**

I really enjoyed playing with the Evolution Extreme X paddle and would like to thank Pickleball Central for providing these demo paddles to our association.

I am a 59-year-old male, 3.5 level player, and have been playing pickleball regularly for 5 years.

The Evolution Extreme X has a nice weight, not too heavy, not too light, so it gave me good control. I noticed that my long shots, and lobs were much more accurate than usual, and dinking the ball seemed a little less troublesome than my regular paddle. I also really liked the circumference of the handle, which enabled me better overall control, especially with my backhanded shots.

I really enjoyed the more pronounced edge of the paddle, which enabled me to execute some really crazy spins!

In closing, the culmination of the weight, shape, paddle edge, and handle circumference resulted in improved play for me, and definitely need to put this paddle on my holiday gift list!

Cheers!
