

**Review of Omega Evolution Extreme X 5/8 inch Paddle
by Patricia Guzman. Secretary of the Howard County Pickleball Association**

I really enjoyed playing with the Evolution Extreme X paddle and would like to thank Pickleball Central for providing these demo paddles to our association.

I am a 63-year-old female (3.5 level) and have been playing pickleball regularly for several years. While using the Evolution Extreme X, I maintained my normal level of power and really enjoyed the control the paddle provided. I was able to dink with confidence and could transition to smashes without any issues.

The things I liked the most were the extended length of the paddle and the feel of the grip. The paddle is longer than my current one and it allowed me to extend my reach for both backhands and forehands. In addition, the grip felt great in my hand, better than any paddle I have used.

This paddle is thick (at 5/8 inch) and has a larger edge guard than other paddles I have used. I think this paddle would be great for people who like to use the edge guard for their spin shots.

Some of my friends also played with the paddle. They thought the Evolution Extreme X had a nice touch, and really liked the feel of the grip.
